The Standard Barometer and Thermometer are read at 6 A.M., 10 A.M., 4 P.M. and 8 P.M., and the daily means are obtained by the application of hourly corrections, deduced from hourly mean observations. The index of the barometer is corrected for atmospheric level of the sea, and the correction of the same is given in feet from the ground. The wind, rain, and general weather registered are for the average Civil Day—from midnight to midnight.

The total quantity of rain collected was January 36.1 in 24.00 inches, the average day for the month being 4.50 inches.
